

**FEMEA**  
MILANO

“

Femea Milano was born from the need to combine art and design, new and antique. Our creations are all handmade.

*All bags are numbered and unique.*

The leather used is of first choice, selected by a trained staff to ensure its high quality. The bas-reliefs are handmade by master craftsmen. They reproduce the travertine marble with its unique characteristics.

Signs and spots are not to be considered imperfections but they are synonymous with the uniqueness of the product. The brand was born in 2016 from the intuition of the manager Luca Cantele and the architect Fabiana Scrudato to blend an ancient element such as the carved stone and a simple and modern fashion element like the leather bag.

After 2 years of studies, the bags dedicated to three of the most important Italian cities are born: Rome, Milan and Venice. With their three different skylines they pay homage to the craftsmanship and the capacity to look beyond typical of their citizens.

# MILANO

---
